Spin-off projects

NOWITECH research partners are attractive: Since start-up 73 new projects with an accumulated budget of over NOK 1500 million have been started related to research in offshore wind energy. The projects are with EU or Nordic funding (26), national competence building projects or infrastructure (33) or industry driven with RCN co-funding (13). These projects are with separate contracts external to NOWITECH, but carried out in alignment with NOWITECH providing added value. A selection of projects is listed in Table 1. Several bilateral projects directly for industry is in addition to the selected projects.
