

Wood Build Norway Norsk Tredag 2013

WEDNESDAY 12TH OF JUNE

→ ARKITEKTENES HUS, OSLO

WOOD BUILD NORWAY 2013

Wood Build Norway 2013 focuses on high-rise wooden buildings. The workroom of Wood Build Norway 2013 is defined at the intersection between architecture, political priorities and environmental benefits, as well as increased housing pressure and demands for cost optimization of buildings in urban areas.

The program emphasizes collaboration across the Nordic borders and looks at lessons learned from relevant European projects: At Wood Build Norway 2013 we have the privilege to welcome the people behind some of the most progressive high-rise wooden buildings in Europe to lecture on experiences, design and realization of their buildings, and we invite interested parties to contribute and discuss issues and solutions for a similarly progressive development in Scandinavia.

Project: **Norwegian Wood in Stavanger**. AART architects.

PROGRAMME BRØD & MILJØ + WOOD BUILD NORWAY / NORSK TREDAG 2013

Brød & Miljø
