The impact of Offshore Wind on Onshore Communities in Haugalandet, Norway

Thea Lurås Oftebro

EERA DeepWind 2025

15- 17 January

Introduction

- Windturbines out at sea
- Coexistence
- How do wind farms affect people who do not see them?

Background

- Floating offshore wind days
- Menon Economics
- 14 Assembly or installation ports for offshore wind

How does this affect local communities
where these sites are located?

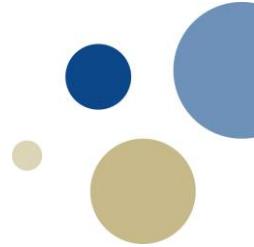

Ethnographic fieldwork

- Two weeks
- Haugalandet
- Interviews
- Local communities
- Visible engagement

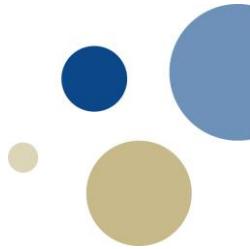

Insight from the field trip

- Split views
- What are the arguments?

Hopes and concerns

- Population growth
- Schools
- Traffic
- Economic benefit for municipality
- Restricted access to the fjord
- Pollution
- Decrease in tourism

Final remarks

- Large onshore areas is needed to realise offshore wind
- The impact of offshore wind parks extends beyond the immediate neighbours

Thank you for your attention!
