

Welcome to the Spring HFC meeting  
**New trends in holistic safety management –the  
gap between theory and practice**

11<sup>th</sup> of May 12:30-16:00 CEST

12<sup>th</sup> of May 09:00-12:35 CEST

## HFC WEB – meeting

Meeting is based on Microsoft Teams – presenters will share their content from their PC, and present - followed by Q/A after the presentations

A moderator will manage the discussion – use «Meeting Chat» or «Raise Your Hand» to ask a specific question. (If missing time we´ll try to answer later).

Please turn of your sound/microphone during the meeting. Use headphones with microphone when asking questions.

All participants will get a copy of the slides later.

Please fill out the evaluation to give your feedback.

Please send us an evaluation of the meeting

## Evaluering av HFC Møtet 11. &12.mai 2021 - WEB

New trends in holistic safety management –the gap between theory and practice

Kryss av under Vurdering, bruk "+" om du er fornøyd og "-" om du ikke er fornøyd. (Nøytral vurdering angis ved å krysse av under 0). Skriv utdypende kommentarer på side 1-2. (+ Good; 0- Neutral;- Poor)

Tema (Evaluation of presentation)	Evaluation			Utdypende kommentarer (Comments)
1) Analysing the human contribution to risk in the UK Offshore Industry: the good, the bad & the ugly from a regulatory perspective N. Dickey/HSE	+	0	-	
2) Turning theory into practice B. Annan /BP	+	0	-	
3) Øker faren for storulykker i olje- og gassindustrien – hva er utfordringene? J.E. Vinnem/NTNU	+	0	-	

3

## HFC Network

HFC – Human Factors in Control – A forum for users, researchers, and consultants of Human Factors methods; meeting twice a year.

(Members, approx. 20 organisations )

More information found at our WEB-site – [www.hfc.sintef.no](http://www.hfc.sintef.no)

Themes in the last meetings:

- Humans in modern transport systems - who is in control?;
- Managing Maritime operations through Human Factors
- Learning from failures, learning from successes - Human Factors in Accident Investigations (one case H. Ingstad accident)

New trends in holistic safety management –the gap between theory and practice
