# INFACON XVI

Ferroalloys - materials for the future

- New raw materials, new processes, new environmental solutions

**The 16th International Ferroalloys Congress (INFACON XVI) will be held at the Clarion Hotel & Congress Trondheim, Norway, from 6-9 June 2021.**

INFACON (International Ferroalloys Congress) was founded in South Africa in 1974 by the SAIMM (Southern African Institute of Mining and Metallurgy), Mintek (then the National Institute for Metallurgy), and the Ferroalloys Producers' Association (FAPA) when the first INFACON was held in Johannesburg.

The intention of INFACON is to stimulate technical interchange on all aspects of ferroalloy production. INFACON contributes to the exchange of research and development covering the major and most of the minor ferroalloys.
