

Safe@Sea work-wear for fishermen with added safety

NANOSCIENCES, NANOTECHNOLOGIES, MATERIALS AND NEW PRODUCTION TECHNOLOGIES – NMP programme
 Collaborative project targeted to SME 2010-2012

A new generation of advanced personal protective clothing for the fishing industry that will lead to a significant increase in safety without reducing work performance.

- New specialty and high-performance materials with improved cut, tear and puncture resistance and coatings with better breathability, scratch and dirt repellence
- Integrated buoyancy and MOB emergency warning unit in the work clothing for faster localisation/rescue
- Improved solutions for head and hand protection
- Improved ergonomic design, comfort and user friendliness
