

Gassco and Transport of CO₂

NORDICCS Final Conference, SAS Scandinavia Hotel, Oslo, November 12, 2015

Gassco and Transport of CO₂

- Several CO₂ studies performed by Gassco on behalf of Norwegian authorities.
- New Gassco CO₂ transport mandate received “Mandat for gjennomføring av mulighetsstudier – fullskala CO₂-håndtering i Norge”:
 - Industrial project development process: feasibility study.
 - Based on pre-feasibility report delivered in May 2015.
 - “Teknologiutvikling – Kostnadsreduksjoner – Læring – Spredningspotensiale”
- Comments:
 - CO₂ sources from other sources than petroleum industry.
 - Technology qualification vs. demonstration.
 - Ship transport of lesser CO₂ volumes vs. pipeline transport of large volumes.
 - Transition phase now? Studies of pipeline transport/larger volumes later?
 - Norway vs. Nordic countries.
 - Design basis for entire chain and cost optimal solutions.
 - “Spredningspotensiale” and flexibility.
