

# SINTEF Technology and Society

SINTEF Technology and Society is a cross-disciplinary institute carrying out research in both the technical-industrial and social science fields. Our role in society is to identify solutions to the major challenges that lie at the interface of societal and technological development. In close collaboration with

our clients in the private and public sectors, we carry out applied research and innovation targeted at working life and business, energy and the climate, health, socio-demographics and welfare, smart transport systems, and safe and secure communities.
