

SINTEF Industry

SINTEF Industry carries out contract-based research offering high levels of expertise in the fields of materials and nanotechnology, biotechnology and nanomedicine, sustainable energy, process technology, metals production and processing, petroleum technology, applied chemistry and industrial economics. Sustainable

development and wealth creation are fundamental to all our activities. Our multidisciplinary knowledge base acts as a foundation for the development of enabling technologies and cross-disciplinary solutions across a broad range of market sectors in close collaboration with our clients and research partners.
