

Invitation to Key Stakeholders

H2020 project GATEWAY, alignment meeting

- PCI for CCS around the North Sea

The H2020 project GATEWAY aims to develop a pilot case for a cross-border transport infrastructure connecting major European CO₂ sources and sinks. The pilot case aims to contribute to Rotterdam Nucleus being a PCI candidate in 2017.

The project has come to its mid-term and finds itself at a critical and exciting moment. At the alignment meeting, we will present the chosen pilot case ROTTERDAM Nucleus including status of legal and commercial considerations and viewpoints of key public and private stakeholders.

We believe you, as a stakeholder representative, have valuable inputs to the GATEWAY pilot case development, and kindly ask you to take part in this alignment meeting.

Tuesday 13th September 2016, 18:00 – 20:00 CEST

Leopold Hotel Brussels EU Dress code: Business casual
