

Demonstration of ERMS Drilling Model

Mark Reed

SINTEF Marine Environmental Technology

ERMS Final Seminar

Oslo

September 27, 2007

DREAM: brief history of the software

- NRDAM: natural resource damage assessment model developed in USA 1985 – 1996
 - Circa \$US 2 million in development and testing
 - Open code
- Provided the basis for ProVann
 - Produced water exposure model developed for Statoil in 1994-5
 - Single chemical component model
- DREAM
 - Advanced produced water model (1996 – 1999)
 - Statoil, Eni, Norsk Hydro, Elf, SINTEF, TNO, Akvamiljø
 - Complex mixtures of chemicals
 - Focus on environmental risk assessment
- ERMS
 - Integration of drilling discharges into DREAM framework
 - Total, Petrobras, Shell, Eni, Hydro, Conoco-Phillips, ExxonMobil, Statoil, SINTEF, TNO, Akvamiljø, Akvaplan-Niva

Drilling Discharge

Site name: Basecase-07

Location
Longitude: 3 deg 14.8973 min East
Latitude: 56 deg 19.9960 min North

Repeated drilling: Repeat interval: 0 days

Section: 2 of 2

Section Info Components

Start of discharge: 1 hrs
Discharge type: drilling discharge
Section length: 1775 m
Drilling rate: 25 m/h
Duration of drilling: 71.000 hrs
Wellbore diameter: 16 inches
Wellbore washout: 10 %
Discharge depth: 10 m
Depth reference: below sea surface
Discharge temp.: 10 °C
Disch.wat. salinity: 35 ppt

Near field model: Plume3D
Outlet diameter: 0.5 m
Angle from north: 0 deg
Angle from vertical: 180 deg
Droplet size
Minimum size: 10 µm
Maximum size: 100 µm
Characteristic size: 50 µm
Size-spread parameter: 2.5
Number of data points: 20

Agglomerate:
Auto-Attach:

Batch discharge or discharge during the drilling activity.
Batch discharges may take place from drilling rig separated from the actual drilling.

Drilling Discharge

Site name: Basecase-07

Location
Longitude: 3 deg 14.8973 min East
Latitude: 56 deg 19.9960 min North

Repeated drilling: Repeat interval: 0 days

Section: 2 of 2

Section Info Components

Cutting Component EIF_Cuttings-base [Select...]
Total amount 607.854 tons

Mud Components in tons

EIF_Barite	40.000	Add P_Mat
Dissolving-chem	6.000	Add Chem
		Edit
		Remove

Total mud 675 tons

Additive Chemicals in tons

		Add
		Edit
		Remove

Attached Chemicals

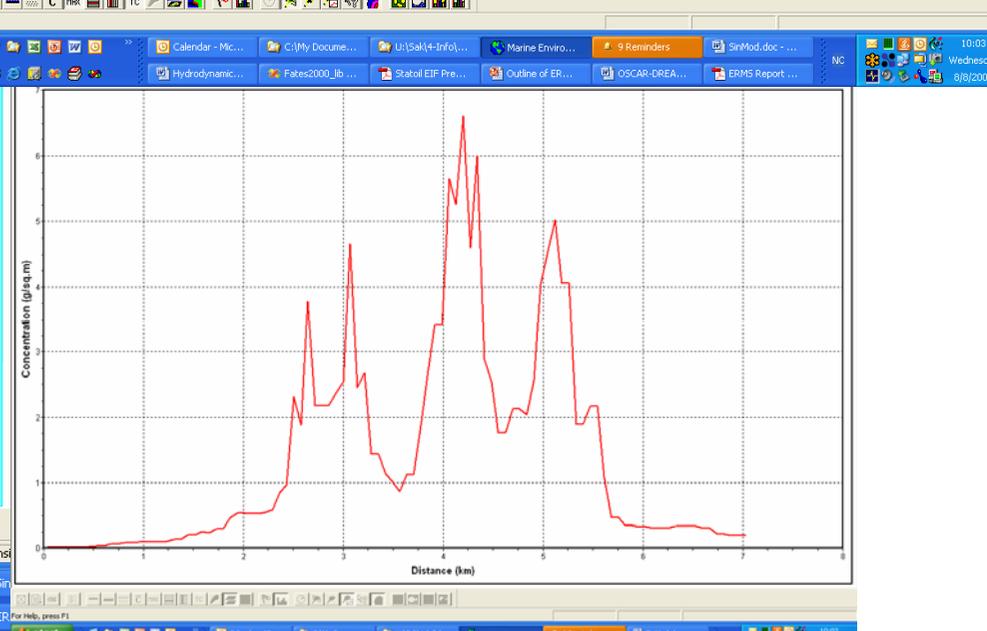

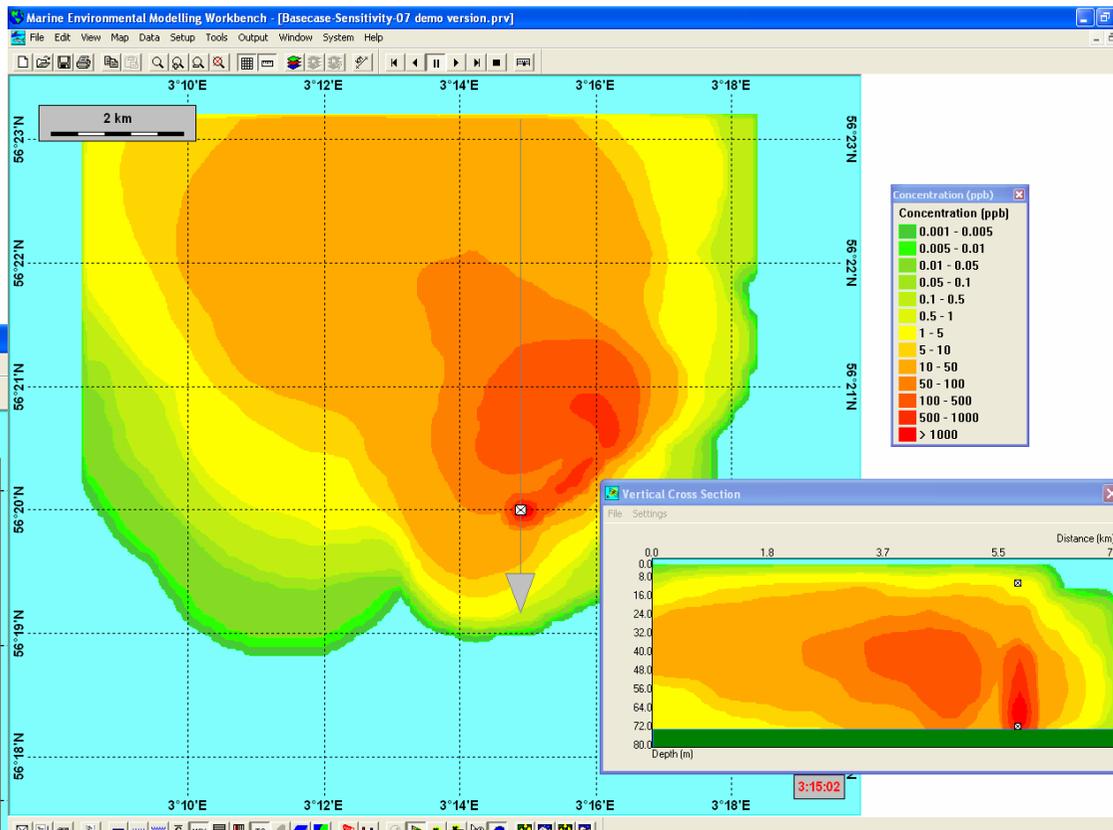

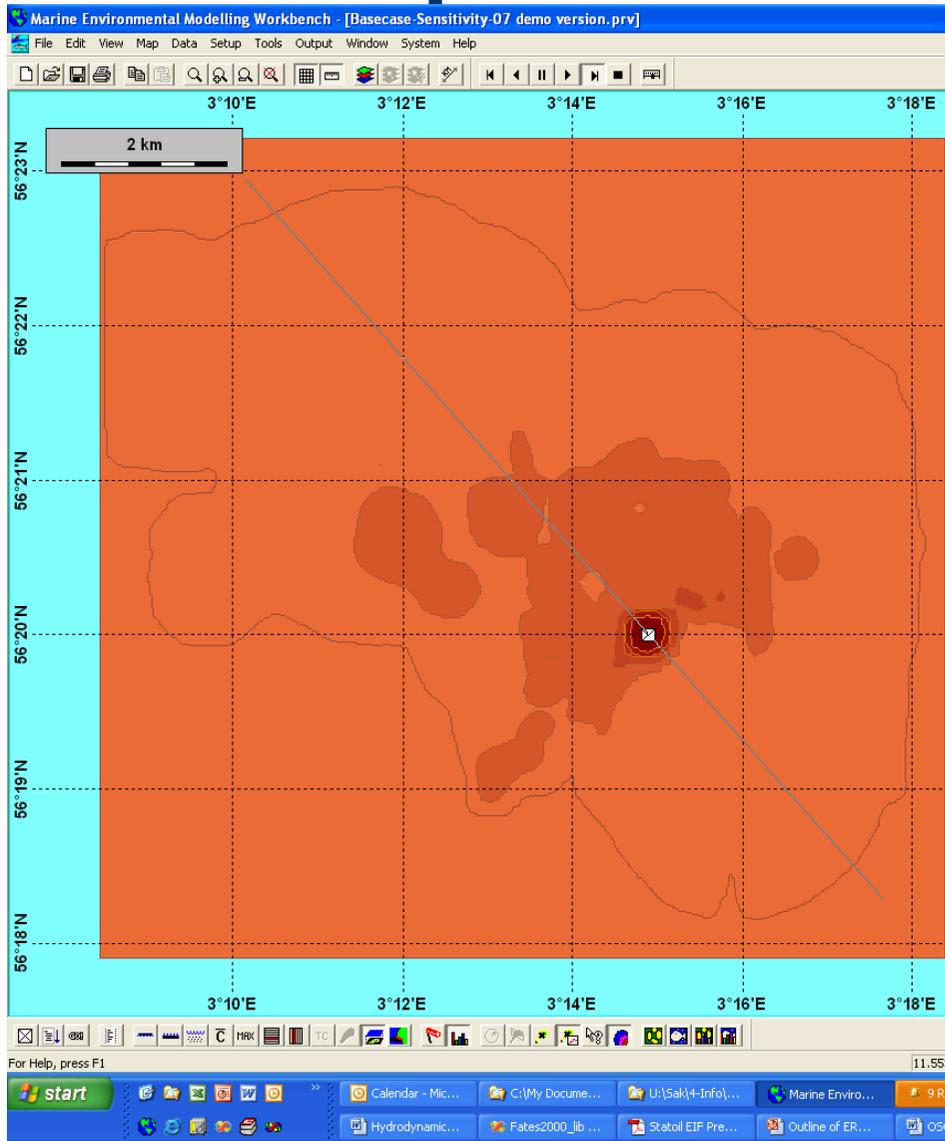

EIF_Cadmium_Barite [EIF_Ba...	2.000 ppm	Add
EIF_Zinc_Barite [EIF_Barite]	140.000 ppm	Edit
EIF_Copper_Barite [EIF_Barite]	50.000 ppm	Remove
Agglom-chem_Ba [EIF_Barite]	1.000e+05 ppm	

Specify the name of the release site.
